

wearing instructions

hip carry

6 mos +

1

Put the sling on with the padding on the inside. Wear the sling on the shoulder of your dominant hand for this carry.

2

Line up the seam with the opposite nipple. Toss your kiddo up onto your shoulder.

3

Put baby's feet all the way through. Slide the sling around so the seam is in line with baby's spine.

4

Open the folds of the pouch to make a seat. Drop baby into the seat by lowering baby's bottom between the layers of fabric.

5

The bottom padded rail should be under baby's knees and the top unpadded rail can be pulled up over baby's back.

6

Or you can pull the top unpadded rail up above baby's shoulders for more snuggle.
